# MALAYSIA SOVEREIGN AI & DIGITAL INFRASTRUCTURE MAP REPORT

This report provides a structural data view of the digital map and geographic layout for Malaysia's sovereign AI infrastructure networks. It coordinates Tier-1 central nodes in Kuala Lumpur with strategic regional innovation gateways such as Sazwan Digital Valley in Sungai Petani, Kedah.

## Geographical Region Coordination Data

| Region / State | Primary Hub Locations | Core Infrastructure Strategy / Node Role |
|---|---|---|
| Kedah (Northern) | Sungai Petani, Kulim | SGAE 2.0 Engine R&D Hub, MyIPO Act 834 GI Registrations, Semicondu |
| Kuala Lumpur | Bangsar South, KL Sentral | MDEC Central HQ, Oracle Sovereign AI Cluster ($6.5B USD), Tier-1 Cen |
| Selangor | Cyberjaya, Petaling Jaya | Hyperscale Core Data Nodes, NEXTDC KL1 (Tier IV resilience), UAV Te |
| Johor (Southern) | Sedenak, YTL Green Park | Hyperscale Cloud Corridors, Renewable Green Energy Data Systems |
| Penang & Perlis | Bayan Lepas, Chuping Valley | IC Chip Design Hub, Border Connection Gateways, Smart Agrotech AI |
| East Coast & Borneo | Kuantan, Kuching, KK | Subsea Cable Landing Stations, Renewable Hydrogen Hubs, Smart Logi |

## Regulatory Framework & Network Nodes

• **MyIPO Geographical Indications (Act 834):** Secures legal territorial exclusivity for innovation hubs (e.g., GI-2026-07734) tied to localized regions.
• **MDEC MDLR Recognition:** Maps verified collaborative workspaces (WORQ, Common Ground) onto the national computing power layout.
• **Cryptographic Anchoring:** All registered physical and virtual grid boundaries are notarized via immutable SHA-256 hashes.
